👤 PROFILE

Software Engineer with **8+ years of experience** across **10+ companies and clients** in the **USA, the UK and Colombia**, from start-ups to global companies such as EPAM Systems, Perficient and Billtrust. Currently a **Software Solutions Architect** and **Forward Deployed Engineer**, working directly with clients to turn their operations into production-ready software, from MVP to launch. Specialized in **web full-stack development** with a back-end focus in **Python** and **JavaScript/TypeScript**, and in **AI-assisted development** with Claude Code and GitHub Copilot. **6 years working in English** with US-based clients and international teams, and vetted in **Toptal's top 3%**.

👤 SKILLS

Core: Python, JavaScript, TypeScript, React, Next.js, Node.js, FastAPI, PostgreSQL, Docker, AWS

AI-assisted development: Claude Code (custom skills, hooks, agents, subagents, orchestration), GitHub Copilot

Also: Angular, NestJS, Express.js, Flask, Django, GraphQL, REST APIs, MySQL, Snowflake, MongoDB, GCP, Azure, Vercel, Tailwind CSS, Stripe, CI/CD

📁 EXPERIENCE

Now. Software Solutions Architect at **Cielo Travel** (Mar 2026 – Present): leading the architecture and back end of an internal platform built from scratch that replaces spreadsheet-based airport pickup and return operations, so bookings, scheduling and payments run in one system. **Freelance Senior FDE** at **Toptal** (Sep 2024 – Present): short-term contracts for Toptal clients, including automated PowerPoint generation from survey data for **Evidenza** and a paid client-onboarding flow for **Taxalign**.

Before. Senior Software Engineer at **Billtrust** (2024 – 2026), building payment-analytics dashboards that gave B2B clients clear visibility into their payment performance. **Software Engineer** at **Capitol AI** (2023 – 2024), delivering content export for an AI creativity platform. **Senior Software Engineer** at **Olive Tree Holdings** (2023), automating deal documents to cut brokers' manual work. **Software Engineer** at **EPAM Systems** (2021 – 2023), modernizing two enterprise applications and their data stack. **Mid-Level Software Engineer** at **Perficient** (2021), leading the syndication module of an advertising console for Interpublic Group. Earlier, at **SC Computing** (SisteCrédito), **Educativ** and as a freelancer (2018 – 2021): cut payment costs with direct gateway integrations, built a student-dropout prediction platform, and delivered web apps for academic clients.

🎓 EDUCATION & LANGUAGES

Bachelor's Degree in Software Engineering · University of Medellín · 2016 – 2021

Certifications: Google Cloud Fundamentals (Coursera) · EF SET English C1 Advanced (65/100) · AI for Problem Resolution (EAFIT University)

Languages: Spanish (Native) · English (C1 Advanced)
